

NORTH ANDOVER BOARD OF HEALTH REGULATION RESTRICTING OFFAL HAULER TRAFFIC

The North Andover Board of Health recognizes that problems exist when offal hauling trucks travel through residential districts. These problems range from those of traffic safety to potential contamination of roadways from leaking trucks or spills. Therefore, acting under M.G.L. Chapter 111, Section 31, 31A and 31B, the following regulation is promulgated:

Offal hauler traffic bound for GLSD shall travel only on Route 495 and/or Route 125 to Sutton Street and to the Greater Lawrence Sanitary District. No roads on the west side of 125 shall be used unless the offal hauler has been hired to pick up a load in the area.

Whoever violates this regulation shall be punished by a fine of not more than fifty dollars for each violation.

Effective date; April 30, 1998

Gayton Osgood, Chairman

Dr. John Rizza, D.M.D., Clerk

Dr. Francis P. MacMillan, M.D., Member
